Shubham Kadam | *Frontend Developer*

Mumbai, India | +91-8828789652 | shubhamkadam2801@gmail.com
LinkedIn: [shubham-kadam] | GitHub: [IShubh-10] | Portfolio: [url]

PROFESSIONAL SUMMARY

Frontend Developer with 3+ years of experience (including a 1-year internship) building responsive web interfaces, internal tools and marketing automation solutions using React.js, JavaScript, Node.js and REST APIs. Skilled at designing complex automated customer journeys and integrations across SMS, WhatsApp, Email, Web Push and Mobile Push. Built internal tools that bulk-create 1000+ campaigns from a single CSV upload and generate dynamic personalized images and email countdown timers on the fly. Works directly with clients and cross-functional teams to turn business requirements into production-ready solutions.

TECHNICAL SKILLS

Languages & Databases: HTML5, CSS3, JavaScript (ES6+), SQL, MySQL

Frameworks & Libraries: React.js, Redux, Node.js, Express.js, jQuery, Material UI, Bootstrap, Styled Components, Nunjucks, Jest

Platforms & APIs: WebEngage (Journeys, Relays, Web & Email Personalization, Segmentation, Catalogs), REST APIs, Chrome Extension APIs, Firebase

Tools: Git, GitLab, Jira, Asana, Postman, Figma, Photopea, BrowserStack, VS Code, Eclipse IDE, IntelliJ IDEA

PROFESSIONAL EXPERIENCE

WebEngage — *Mumbai, India*

Frontend Developer — Sep 2025 - Present

- Build internal web tools and Chrome extensions with React.js, JavaScript, Node.js and REST APIs that automate repetitive campaign work, cutting execution time from hours to minutes (see Key Projects).
- Deliver end-to-end WebEngage implementations for enterprise clients, covering web implementations, on-site and email personalization, omnichannel campaigns and customer journey automation.
- Build complex customer journeys and automated workflows using event-based triggers, conditional branching, JavaScript and REST API integrations that connect client systems with WebEngage.
- Partner with Sales and Customer Success to identify business use cases, build prototypes and demonstrate platform capabilities through working technical solutions.
- Troubleshoot issues across frontend code, backend services and third-party integrations, improve existing implementations and provide technical guidance to team members.

Junior Frontend Developer — Oct 2024 - Sep 2025

- Developed responsive, cross-browser campaign assets, including surveys, in-app notifications, web and email personalization and interactive content, using HTML5, CSS3, JavaScript, jQuery and Nunjucks with REST API integrations.
- Implemented dynamic, personalized campaign experiences using user segmentation, targeting rules and catalog-driven content to support client engagement and conversion goals.
- Worked closely with Customer Success Managers and clients to translate business requirements into campaign strategies and technical implementations.
- Performed cross-browser and cross-device testing on BrowserStack to ensure consistent rendering, functionality and user experience across platforms.

NimbleWork, Inc. (formerly Digite) — *Mumbai, India*

Software Developer Intern — Aug 2023 - Jul 2024

- Developed and maintained Nimble Production, a social sales and marketing CRM used by MNCs for contact organization, follow-up tasks, outreach tracking and multi-pipeline management.
- Upgraded source code, React components and micro frontends (JSP and React.js) to improve performance and long-term maintainability.
- Migrated Material UI from v4 to v5.15.6, adding new components and styles while updating Jest unit tests to maintain coverage and reliability.
- Automated document validation by building a web service against the W3C Markup Validation API, ensuring HTML compliance across the application.
- Upgraded CryptoJS to strengthen encryption and better protect user data.
- Resolved Jira defects consistently and took part in code reviews, proposing optimized solutions.

KEY PROJECTS

Multi-Channel Campaign Automation - Chrome Extension

Tech Stack: JavaScript, Chrome Extension APIs, REST APIs

- Built a Chrome extension that creates 1000+ campaigns across SMS, WhatsApp, Email, Web Push and Mobile Push from a single CSV upload, replacing a fully manual, campaign-by-campaign setup process.
- Integrated platform REST APIs with CSV parsing, field mapping, validation and error reporting so failed rows are surfaced clearly instead of silently dropped.
- Adopted across the delivery team, reducing bulk campaign setup from several days of manual work to a single upload.

ImageEngage - Dynamic Image Personalization Tool

Tech Stack: JavaScript, Node.js, Express.js, MySQL, REST APIs

- Developed a tool that generates dynamic, personalized images on the fly from user attributes, enabling one-to-one visual personalization at scale in campaigns.
- Built personalized email countdown timers that render per recipient, supporting urgency-driven promotional and retention campaigns.
- Exposed a simple configuration interface so non-technical team members can generate assets without developer involvement.

Campaign Gallery Dashboard

Tech Stack: React.js, JavaScript, Node.js, Express.js, MySQL, REST APIs

- Created a centralized dashboard that stores and catalogs daily campaign work, giving the team a searchable library of delivered use cases.
- Used by Sales and Growth teams as a live reference to showcase platform capabilities and real implementation examples to prospects and clients.

EDUCATION

Java Full Stack Development Nov 2021 - Jun 2023

Squad Infotech Pvt. Ltd., Mumbai, India

Bachelor of Commerce Jun 2018 - May 2021

Tolani College of Commerce, Mumbai, India
